

Your project doesn't have to wait.

TUBE LASER

Accelerating production with our new tube laser.

At ZK Design, we invest in technology to bring you more efficient solutions. Our new Bodor tube laser allows us to deliver more precise parts in less time and opens the door to innovative designs that simplify a final assembly.

DESIGN

Key Advantages

SPEED & FLEXIBILITY

Shorter lead times thanks to complete in-house production.

Fast and flexible production of samples and prototypes.

Immediate response to project changes.

PRECISION & QUALITY

Parts ready for immediate assembly—no further processing required.

100% repeatability for both single-piece and large-series production.

Clean cuts for flawless surface quality.

INNOVATIVE DESIGN & ASSEMBLY

Execution of complex shapes, design elements, logos, and lettering.

Kit-like construction thanks to precise technological locking joints.

Cost savings on welding jigs and assembly time.

Technical Specifications:

- **Materials:** Steel, Stainless Steel, Aluminum
- **Profiles:** Round, square, rectangular (hollow sections), oval, and more
- **Angle Cutting:** Up to 45° with a 3D tilting head
- **Maximum Dimensions:** Diameter 20–230 mm, length up to 6500 mm
